Jeremiah J. Park

Authorized to work in the U.S.

PROFESSIONAL SUMMARY

Software engineer with 4+ years of experience building backend APIs, frontend tools, and AWS event-driven systems for 100+ enterprise clients. Experienced with **Node.js**, **TypeScript**, **React**, **PostgreSQL**, **Kafka**, **Lambda**, **EventBridge**, and **Terraform.** Regularly debug and resolve complex production issues across client-facing systems. Interested in scalability, reliability, and platform infrastructure.

WORK EXPERIENCE

▸ **Software Engineer, Relay Network · Radnor, PA** **Feb 2022 - Present**

- Built and maintained backend services in **Node.js**, **TypeScript**, and **PostgreSQL** powering APIs and event-driven workflows for 100+ enterprise clients.
- Communicated directly with client teams to investigate and resolve production bugs, tracing root causes and delivering fixes end to end.
- Migrated **Kafka** integrations to **Confluent Kafka** and set up **LocalStack** for local testing of **AWS** services.
- Designed and deployed **AWS** infrastructure using **Lambda**, **EventBridge**, **S3**, and **Terraform** for file delivery and event-driven processing.
- Improved client-facing features, including PowerUps form prefill, Smart Actions, and the Push API configuration UI, with integration tests.

SKILLS

▸ **Languages:** TypeScript, JavaScript (ES6+), Python, Java, C/C++, HTML/CSS, SCSS
▸ **Frameworks / Tools:** Node.js, React.js, Express, Fastify, Flask, Spring Boot
▸ **Cloud & Infra:** AWS (Lambda, S3, EventBridge, IAM), Terraform, Kafka, Serverless Framework, LocalStack
▸ **Database:** PostgreSQL, MySQL, MongoDB, SQLite
▸ **Monitoring & CI/CD:** DataDog, GitHub Actions, Snyk, Slack Alerts, PagerDuty
▸ **Tools:** Git, Postman, Swagger, JUnit, GDB, Jira, VS Code, IntelliJ

TECHNICAL PROJECT EXPERIENCE

▸ **Real-Time Korean-English Subtitle System** **Sep 2025 - Jun 2026**

▸ ***Speech translation system that turns Korean sermons into live English subtitles at Jesuwon Church.***

- Built a **Node.js** backend that captures the pastor's live sermon audio, transcribes it with **Whisper STT**, and translates it into English using **LangChain-based LLM** workflows.
- Developed a real-time subtitle UI that displays sentence-level translations on screen during services, keeping subtitles in sync with the speaker.
- Operated the system during weekly services, reducing subtitle delay by processing shorter audio chunks based on feedback from congregation members.

▸ **Jesuwon Church Homepage Administrator** **Feb 2024 - Present**

▸ ***A long-term initiative to modernize and self-host the Jesuwon Church website by transitioning from an externally hosted PHP/HTML system to React.***

- Debugged layout, script, and rendering issues in the legacy **PHP/HTML** site using **Chrome DevTools**, documenting root causes and coordinating fixes with external web developers.
- Transitioned frontend components to **React** with **SCSS-based** responsive layouts.

EDUCATION

The Pennsylvania State University, State College, PA 3.62/**4.00**
Bachelor of Science: Computer Science **Aug 2016 - May 2021**
